RECIPE CORNER 😊

Gajar Ka Halwa

Prepared by: Sanjay Kumar Saha,
Centre Head, Noida

Ingredients

250g Grated Carrot, 100g Sugar, 50g Ghee, 50g Khoya/Mawa,
50g Chopped cashew nuts, 200g Milk

Preparation Time

40 mins

PROCEDURE

- Grate the carrots.
- Heat a pressure cooker and add ghee to it.
- Once the ghee has melted, add the grated carrots and sauté for 5-7 minutes until the raw smell disappears and the carrots start to soften.
- Add milk and let it come to a boil. Reduce the heat to low and let the mixture simmer until most of the milk has been absorbed by the carrots, stirring occasionally.
- Cover and pressure cook for 5 whistles on medium flame.
- Open the cover and add sugar and Kaju and continue to cook on low heat, stirring frequently, until the mixture thickens and starts to leave the sides of the Cooker. This should take around 20-25 minutes.
- Turn off the heat and let the halwa cool down for a few minutes. Garnish with chopped almonds or pistachios and serve warm or cold. Enjoy!
- Garnish it with dry fruits and serve hot.

Tips to make Gajar Ka Halwa

- ✓ Make sure to not leave any lumps while you grate the carrots. The finer the better.
- ✓ Make sure that you keep the flame low at all times. This is a dessert that is best cooked at its own pace.
- ✓ Keep it only as long as the milk dries up. Do not heat it until it burns.

TAKE A BREAK 😊

RELISHING NATURE BY PRIYANKA NONGKHLAW – PRO MEGHALAYA

How does it feel to return home after a tiring day to a beautiful aroma of Peace Lily with its eye-soothing colour? Or, when your recipes are admired with secret ingredients like Tulsi, or Pudina?

From tiny, emerging flower buds to dark, nutrient-rich compost, Priyanka Nongkhlaw, Partner Relationship Officer, Meghalaya witnesses nature's little miracles every day while she's gardening at her beautiful home garden in Shillong.

“*An indoor garden is one of the best things that you can do to make your home more fresh and wonderful. It not only calms your mind & body but also enhances the aesthetics of your home. The indoor garden can be grown in the smallest of places.*”

Here are a few handy tips by Priyanka to help you grow and maintain your plants indoor:

- 🌿 **Appropriate exposure to light:** Keep your indoor plant behind a curtain or in a corner where they will get sunlight.
- 🌿 **Check Pests:** Ensure to remove spiders, molds etc. at the beginning itself.
- 🌿 **Watering Tricks:** Indoor plants don't require frequent watering. Excess water can rot the roots.
- 🌿 **Pot Selection:** Ensure the pots are not too big in size and have a proper draining system.
- 🌿 **Airy Home:** You need to have good air circulation in the house and keep re-arranging your plants.
- 🌿 **Add Humidity:** Keep the pots close or put the plants in a container filled with pebbles which are soaked in water.
- 🌿 **Fertilizers & Manures:** Organic fertilizers are a must! It's better to avoid chemicals.
- 🌿 **Keep your Plants Clean:** If you see dust on your plants, give them a shower.
- 🌿 **Cut the Branches:** Pick the yellow leaves and dry flowers, cut extra branches and keep them in shape.

FEW OF SUCH EASY TO GROW INDOOR PLANTS: Mammillaria, Jade, Senecio, Echeveria, Crotons etc.
